

Availability and description of connect services

I. Service availability

The technical availability of the individual services included in an Audi connect package may vary from one country to another, therefore not all individual services of an Audi connect package may be available in every country.

Please also note that content availability for specific services is to some extent dependent on third parties and may be subject to country-specific restrictions, which are beyond the control of the AUDI AG and your Audi partner. Despite the technical availability, restrictions may apply for certain services due to the availability of specific content.

The following overview exclusively contains information on the technical availability of individual services per country.

II. Description of service

1. myAudi navigation

1.1 Scope of services and description

MyAudi Navigation enables routes and destinations (from myAudi App) to be seamlessly synchronized and continued with the navigation system in the vehicle. In addition, destinations from the myAudi App can be sent directly to the vehicle.

1.2 Terms of use

A myAudi account, SIM card and a smartphone are required to use the service.

1.3 Restrictions of use

Please note that the availability of the connect service may vary across countries (see overview of service availability per country). In the event of Internet connection problems, it may also lead to limited use of the service.

1.4 Method of order and renewal

When ordering a new car, the connect service is ordered via the corresponding Audi partner. If the order is an extension of the connect service, this is done via myAudi under myAudi App> Shop> connect license extension.

1.5 Method of activation

When ordering a new car, the connect service is already active at the time of delivery. In the case of a connect license extension, the service is activated upon completion of the purchase.

2. Navigation with Google satellite maps™

2.1 Scope of services and description

Navigation with Google satellite maps™ simplifies orientation using high-resolution aerial and satellite images. Google and the Google logo are registered trademarks of Google Inc.

2.2 Terms of use

A SIM card is required to use the service.

2.3 Restrictions of use

Please note that the technical and content availability of the connect service may vary across countries (see overview of service availability per country). In the event of disruptions to the Internet connection, it may also lead to limited use of the service. Google satellite maps is available from model year 2019.

2.4 Method of order and renewal

When ordering a new car, the connect service is ordered via the corresponding Audi partner. If the order is an extension of the connect service, this is done via myAudi under myAudi App> Shop> connect license extension.

2.5 Method of activation

When ordering a new car, the connect service is already active at the time of delivery. In the case of a connect license extension, the service is activated upon completion of the purchase.

3. Online news

3.1 Scope of services and description

With online news, current news and announcements from all over the world can be displayed and read out directly in the vehicle. While driving, news on special topics such as football results, political news or news from the economy can be kept in view.

3.2 Terms of use

A myAudi account and a SIM card are required to use the service.

3.3 Restrictions of use

Please note that the technical and content availability of the connect service may vary across countries (see overview of service availability per country). In the event of disruptions to the Internet connection, it may also lead to limited use of the service.

3.4 Method of order and renewal

When ordering a new car, the connect service is ordered via the corresponding Audi partner. If the order is an extension of the connect service, this is done via myAudi under myAudi App> Shop> connect license extension.

3.5 Method of activation

When ordering a new car, the connect service is already active at the time of delivery. In the case of a connect license extension, the service is activated upon completion of the purchase.

4. Online points of interest

4.1 Scope of services and description

This connect service provides useful additional information on points of interest, for example user ratings from yelp, current occupancy of parking garages or charging stations.

4.2 Terms of use

A SIM card is required to use the service.

4.3 Restrictions of use

Please note that the technical and content availability of the connect service may vary across countries (see overview of service availability per country). In the event of disruptions to the Internet connection, it may also lead to limited use of the service.

4.4 Method of order and renewal

When ordering a new car, the connect service is ordered via the corresponding Audi partner. If the order is an extension of the connect service, this is done via myAudi under myAudi App> Shop> connect license extension.

4.5 Method of activation

When ordering a new car, the connect service is already active at the time of delivery. In the case of a connect license extension, the service is activated upon completion of the purchase.

5. Online speech entry

5.1 Scope of services and description

Online speech entry allows free dictation of e-mails and SMS. In addition, the online comparison improves the quality of results and the recognition rate. For example, it is possible to recognize proper names, so that when entering a destination, the name of a hotel can be searched for directly.

5.2 Terms of use

A SIM card is required to use the service.

5.3 Restrictions of use

Please note that the availability of the connect service may vary across countries (see overview of service availability per country). In the event of Internet connection problems, it may also lead to limited use of the service. Available in selected languages.

5.4 Method of order and renewal

When ordering a new car, the connect service is ordered via the corresponding Audi partner. If the order is an extension of the connect service, this is done via myAudi under myAudi App> Shop> connect license extension.

5.5 Method of activation

When ordering a new car, the connect service is already active at the time of delivery. In the case of a connect license extension, the service is activated upon completion of the purchase.

6. Online traffic information

6.1 Scope of services and description

The online traffic information service provides online information on current traffic situations and thus enables better route calculation.

6.2 Terms of use

A SIM card is required to use the service.

6.3 Restrictions of use

Please note that the technical and content availability of the connect service may vary across countries (see overview of service availability per country). In the event of disruptions to the Internet connection, it may also lead to limited use of the service.

6.4 Method of order and renewal

When ordering a new car, the connect service is ordered via the corresponding Audi partner. If the order is an extension of the connect service, this is done via myAudi under myAudi App> Shop> connect license extension.

6.5 Method of activation

When ordering a new car, the connect service is already active at the time of delivery. In the case of a connect license extension, the service is activated upon completion of the purchase.

7. Weather information

7.1 Scope of services and description

Know how the weather will be, no matter where the journey takes you. Audi connect provides the information you need. For example, the weather can be forecast for the next 7 days or short-term weather developments can be displayed using rain radar.

7.2 Terms of use

A SIM card is required to use the service.

7.3 Restrictions of use

Please note that the technical and content availability of the connect service may vary across countries (see overview of service availability per country). In the event of disruptions to the Internet connection, it may also lead to limited use of the service.

7.4 Method of order and renewal

When ordering a new car, the connect service is ordered via the corresponding Audi partner. If the order is an extension of the connect service, this is done via myAudi under myAudi App> Shop> connect license extension.

7.5 Method of activation

When ordering a new car, the connect service is already active at the time of delivery. In the case of a connect license extension, the service is activated upon completion of the purchase.
